

HUI CHEN, Ph.D.

Department of Agronomy, Kansas State University (KSU)

2004 Throckmorton Plant Sciences Center, 1712 Claflin Road, Manhattan, KS 66506, USA

huchen98@ksu.edu; (785)532-7254 (office)

EDUCATION

Ph.D. Plant Molecular Biology and Virology, Ehime University, Japan	2010
M.S. Plant Molecular Biology and Virology, Ehime University, Japan	2007
M.S. Crop Genetics and Breeding, Hainan University (former South China University of Tropical Agriculture), China	1998
B.S. Tropical Agriculture, Hainan University, China	1995

PROFESSIONAL EXPERIENCE

Research Assistant Professor (Faculty), Department of Agronomy, KSU, Manhattan KS, USA	Jan 2019-Present
•Exploring novel genetic transformation and genome editing strategies in wheat.	
•Development and optimization of a <i>Barley stripe mosaic virus</i> (BSMV)-mediated gene editing system to improve FHB resistance in wheat.	
•Identification of candidate proteins that can interact with Fhb1 and PHS.	
Research Associate, Department of Agronomy, KSU, Manhattan KS, USA	Jan 2016-Jan 2019
•Application of CRISPR technologies for genome editing in wheat.	
•Understanding the molecular and genetic mechanisms of wheat resistance to diseases (Fusarium Head Blight, FHB and Leaf rust, Lr) and Pre-harvest sprouting (PHS).	
Post-doctoral Fellow, University of Western Ontario, London, Canada	Dec 2014-Dec 2015
•Developing novel soybean lines with resistance to <i>Soybean Mosaic Virus</i> (SMV) through TILLING and next-generation sequencing.	
NSERC Research Fellow, Agriculture and Agri-Food Canada, London, Canada	Dec 2011-Nov 2014
•Investigating the regulatory roles of small RNAs and global transcriptional response to <i>Soybean Mosaic Virus</i> (SMV) infection in soybean using next-generation sequencing.	
•Developing novel peach variety with resistant to <i>Plum Pox Virus</i> (PPV) through TILLING and next-generation sequencing.	
Research Fellow, Faculty of Agriculture, Ehime University, Matsuyama, Japan	Apr 2010-Nov 2011
•Genetic research on Hierarchical interaction between Tobamovirus and L resistance gene.	
•Molecular functional analysis of rice genes involved in RNA silencing and antiviral pathway	
Visiting Scientist, Biotrop Laboratory, CIRAD-CA, Montpellier, France	June 2001-Nov 2001
•Genetic mapping on cv R570 genome using microsatellite markers.	
Research Scientist and Lab Director, Sugarcane Research Institute, Yunnan Academy of Agricultural Sciences, Kaiyuan, China	July 1998-Sept 2004
•QTL analysis for sugarcane introgression breeding using molecular markers (SSR, AFLP).	
•Sugarcane genetic diversity and phylogeny using molecular markers (RAPD).	
•Diagnostic tests for exporting and importing sugarcane varieties using serological and molecular techniques (ELISA, RT-PCR).	

GRANTS, AWARDS AND FELLOWSHIPS/SCHOLARSHIPS

Grants:

- Bai, G. H., **Chen, H.** (Co-PI) (2022-2026), U.S. Wheat and Barley Scab Initiative (USWBSI) Project, “Develop a transgene-free nanoparticle-mediated genome editing system for gene functional characterization and breeding for FHB resistance in wheat”, \$240,000 (Pending)
- Bai, G. H., **Chen, H.** (Co-PI) and Tian B. (Co-PI) (2020-2021), U.S. Wheat and Barley Scab Initiative (USWBSI) Project, “Function analysis of Fhb1 using *BSMV*-mediated CRISPR/Cas9 gene editing system”, \$100,000
- Bai, G. H. and **Chen, H.** (Co-PI) (2018-2019), U.S. Wheat and Barley Scab Initiative (USWBSI) Project, “*Barley Stripe Mosaic Virus*-mediated CRISPR/Cas9 genome editing for FHB resistance improvement”, \$60,000
- Nishiguchi, M. and **Chen, H.** (Co-PI) (2012-2016), Promotion Program for Agriculture, Forestry, Fisheries and Food Industry, the Ministry of Education, Culture, Sports, Science and Technology of Japan, “Analysis of rice genes involved in RNA silencing and response to virus”, JPY ¥ 4,290,000 (USD \$38,610)
- **Chen, H.** (PI) (2003-2006), Yunnan Natural Science Foundation, “Molecular breeding and marker-assisted selection using sugarcane germplasms”, CNY ¥ 60,000 (USD \$ 9,369)
- Fan, Y. H. and **Chen, H.** (Co-PI) (2002-2005), Key Project of Yunnan Provincial International Collaboration, “Developing diagnostics tools for quarantine disease in exotic sugarcane varieties”, CNY ¥ 400,000 (USD \$62,460)

Awards:

- 32nd Annual Meeting of American Society for Virology, State College, PA, USA, July 20-24, 2013, Travel Award
- 9th International Plant Molecular Biology Congress, St. Louis, MO, USA, October 25-30, 2009, Travel Award
- 4th International Crop Science Congress, Brisbane, Australia, September 26-October 1, 2004, Travel Award

Fellowships/Scholarships:

- Natural Sciences and Engineering Research Council of Canada (NSERC), London, Canada, December 2011- November 2014, Agriculture and Agri-Food Canada (AAFC) Visiting Fellowship
- Ministry of Education, Culture, Sports, Science and Technology (MEXT) of Japan, M.S. and Ph.D. study, Ehime University, Matsuyama, Japan, October 2004 - March 2010, Japanese Government Scholarship
- International cooperation project (PRA) between China government and France government, Molecular Markers Training on Sugarcane Genetic Mapping, CIRAD, Montpellier, France, June-November 2001, France Government Fellowship

PROFESSIONAL SERVICE

Journal Reviewer Board Member: *Applied Sciences; Genes*

Journal Reviewer: *Plant Molecular Pathology, Scientific Reports, Molecular Plant-Microbe Interactions, PeerJ, Plant Protection Science, In Vitro Cellular & Developmental Biology-Plant; Ecotoxicology; Toxins; MDPI: Agronomy, Applied Sciences, Genes, Plants, Cells, Viruses, Non-Coding RNA, International Journal of Molecular Sciences*

PROFESSIONAL MEMBERSHIP
