- Travel Dates: Jan. 2-14, 2017
- AGRON 502-International Experience in Agronomy
- AGRON 902-International Agronomy Experience for Graduate Students

COST

- Cost estimates will be provided later

PROGRAM DESCRIPTION

The objectives of this course are for students to learn about and gain first-hand experience with:

- diverse cropping systems of tropical agriculture,
- agronomic challenges and opportunities resulting from tropical soils and climates, and
- management practices that have been used to increase agricultural productivity in the tropics.
